PHYSIOLOGY AND BIOCHEMISTY

Senescence of oat leaves: changes in the free sterol composition and enzyme activities of the plasma membrane
by M. Venken, H. Asard, J.M.C. Geuns, R. Caubergs and J.A. De Greef (Antwerp and Heverlee, Belgium) 3–11

Hydroxyproline-rich glycoproteins in cell walls of pericarp from maize
by E.E. Hood, K.R. Hood and S.E. Fritz (Logan, UT) 13–22

Microsomal ATP-dependent Ca^{2+} transport as affected by environmental stress in *Bryonia dioica* internodes
by P. Bourgeade, G. De Jaegher and N. Boyer (Clermont-Ferrand, France) 23–30

Triacontanol stimulates NADH oxidase of soybean hypocotyl plasma membrane
by D. James Morré, G. Selldén, X.Z. Zhu and A. Brightman (Lafayette, IN and Göteborg, Sweden) 31–36

Resolution of a higher plant protein kinase similar to the catalytic subunit of cyclic AMP-dependent protein kinase
by G.M. Polya, R. Chung and J. Menting (Victoria, Australia) 37–45

Promotive effect of potassium on adventitious root formation in some plants
by Z.R. Zhao, G.R. Li and G.Q. Huang (Tianjin, China) 47–50

Activity and expression of diamine oxidase in lentil seedlings under different growth conditions
by M. Maccarrone, A. Rossi, L. Avigliano and A. Finazzi Agro (Rome, Italy) 51–55

The effect of ethylene and other regulators on coleoptile growth of rice under anoxia
by R.F. Horton (Guelph, Canada) 57–62

Induction of antiviral resistance in plants by chitosan
by H. Pospieszny, S. Chirkov and J. Atabekov (Poznan, Poland and Moscow, U.S.S.R.) 63–68

GENETICS AND MOLECULAR BIOLOGY

Promoter analysis of the highly expressed *rolC* and *rolD* root-inducing genes of *Agrobacterium rhizogenes:* enhancer and tissue-specific DNA determinants are dissociated
by F. Leach and K. Aoyagi (Berkeley, CA) 69–76

Primisulfuron herbicide-resistant tobacco plants: mutant selection in vitro by adventitious shoot formation from cultured leaf discs
by C.T. Harms, J.J. DiMaio, S.M. Jayne, L.A. Middlesteadt, D.V. Negrotto, H. Thompson-Taylor and A.L. Montoya (Research Triangle Park, NC) 77–85

Analysis of a sunflower polyubiquitin promoter by transient expression
by M.-N. Binet, M. Lepetit, J.-H. Weil and L.-H. Tessier (Strasbourg, France) 87–94

CELL AND TISSUE STUDIES IN VITRO

Comparative regenerative ability of internodal segments of wild type and a genic male sterile line of rapeseed (*Brassica napus*) cultured in vitro
by A. Shukla and V.K. Sawhney (Saskatoon, Canada) 95–98

An efficient method for selecting embryogenic callus from *Lycium chinensis* L. cell culture
by C.-S. Liu (Taichung, Taiwan) 99–103

Effects of fungal culture filtrates on tissue from susceptible and resistant genotypes of muskmelon to *Fusarium oxysporum* f. sp. *melonis*
by B. Megnegneau and M. Branchard (Orsay, France) 105–110

Somatic hybrids derived from fusion of a universal hybridizer and a wild type line of *Datura*
by X.D. Du, G.S. Mourad, D. Williams and J. King (Saskatoon, Canada) 111–118

Plant regeneration from callus protoplasts of adult Japanese persimmon (*Diospyros kaki* L.)
by R. Tao, M. Tamura, K. Yonemori and A. Sugiura (Kyoto, Japan) 119–125

GENERAL

Evidence of differences between mannose-binding lectins from nodules and cotyledons of peanut
by I.J. Law, W.F. Brandt and A.J. Mort (Pretoria and Rondebosch, South Africa and Stillwater, OK) 127–133

Corrigendum 135

PHYSIOLOGY AND BIOCHEMISTRY

Developmental patterns of fumarase in storage tissues of seeds following germination
S. Kitajo and Y. Morohashi (Tokyo, Japan) 137–142

Respiration of *Euglena gracilis* grown under conditions of vitamin B_{12}-sufficiency, -deficiency, and -replenishment
J.W. Seeger, Jr. and E.F. Carell (Pittsburgh, PA) 143–148

Ribonucleotide reductase content of vitamin B_{12}-deficient *Euglena gracilis*
J.W. Seeger, Jr. and E.F. Carell (Pittsburgh, PA) 149–155

Photosynthesis and nitrogenase activity in soybean treated with sulphur dioxide and molybdenum
G. Gupta, B. Grund and R. Narayanan (Princess Anne, MD) 157–161

GENERAL AND MOLECULAR BIOLOGY

Regulation of root plasma membrane H^+-ATPase in sunflower seedlings
M. Roldán, J.P. Donaire, J.M. Pardo and R. Serrano (Heidelberg, Germany and Granada, Spain) 163–172

Properties of lupin mitochondrial plasmid-like DNAs and nucleotide sequence of a new minicircular DNA
R.M. Goraczniak and H. Augustyniak (Poznan, Poland) 173–179

CELL AND TISSUE STUDIES IN VITRO

Effect of organic acid pretreatment on the regeneration and development (conversion) of whole plants from callus cultures of alfalfa, *Medicago sativa* L.
J.W. Nichol, D. Slade, P. Viss and D.A. Stuart (Davis, CA) 181–192

Nitrate reductase activity changes during a culture cycle of tobacco cells: the participation of a membrane-bound form enzyme
J. Hoarau, A. Nato, D. Lavergne, V. Flipo and B. Hirel (Orsay and Versailles, France) 192–204

Production of cybrid plants within *Brassicaceae* by fusing protoplasts and plasmolytically induced cytoplasts
E. Sundberg and K. Glimelius (Uppsala, Sweden) 205–216

Clonal propagation of desert teak (*Tecomella undulata*) through tissue culture
T.S. Rathore, R.P. Singh and N.S. Shekhawat (Jodhpur, India) 217–222

Direct DNA uptake during the imbibition of dry cells
T. Senaratna, B.D. McKersie, K.J. Kasha and J.D. Procunier (Guelph, Canada) 223–228

Influence of inorganic salts on cytokinin induced caulogenesis in leaf segments of *Rosmarinus officinalis* L.
P. Misra and H.C. Chaturvedi (Lucknow, India) 229–235

Induction and selection of lincomycin-resistant plants in *Solanum melongena*
A. Sadanandam and M.A. Farooqui (Warangal, India) 237–239

Establishment of a successive culture of an obligatory parasitic flowering plant, *Cuscuta japonica*, in vitro
K. Furuhashi (Niigata, Japan) 241–246

Electroporation-mediated and silicon carbide fiber-mediated DNA delivery in *Agrostis alba* L. (Redtop)
Y. Asano, Y. Otsuki and M. Ugaki (Tsukuba, Japan) 247–252

Repression of plant tissue culture growth by light is caused by photochemical change in the culture medium
R.P. Hangarter and T.C. Stasinopoulos (Columbus, OH) 253–257

Specific selection of embryogenic cell lines in *Agrostis alba* L. using the proline analog thioproline
K. Shetty and Y. Asano (Tsukuba, Japan) 259–263
